

Magnetar, your specialist in magnet fishing

Instruction manual

Assembling Classic magnets

We offer you a step-by-step plan for the assembling of the Classic Magnetar fishing magnets in this instruction manual. We hope that these instructions will help you to start practicing this beautiful hobby and sport as soon as possible.

Step 1: Always read the included warning form before you use our products;

Step 2: Retrieve the items (magnet, eye nut and two rings) from the box;

Step 3: Unpack the rings and the magnet;

Step 4: Make a choice: If you bought locking glue, you do not have to use the rings. You can assemble the eye nut on the magnet when you put the locking glue on the thread end. Note: always shake the locking glue before usage.

Step 5: It contains a closed ring and an open ring (spring washer). First bring the Spring washer (with the slit) on the eye nut;

Step 6: Then apply the closed ring on top of the spring washer;

Step 7: Turn the eye bolt with the rings into the magnet. Tighten it as tight as possible;

Step 8: Attach the rope and go magnet fishing!
