

The Magnetar logo is a stylized fish shape with the word 'MAGNETAR' written inside it in a bold, white, sans-serif font.An underwater scene showing various pieces of fishing gear and debris floating in the water. A large, cylindrical magnet is the central focus, with a rope attached to it. Other items include a fishing net, a saw blade, a hammer, a wrench, and a fishing lure. The background is a deep blue ocean with some fish visible.

## Instruction manual

---

### Assembling our Exclusive magnets

---

We offer you a step-by-step plan for the assembling of the Exclusive Magnetar fishing magnets in this instruction manual. We hope that these instructions will help you to start practicing this beautiful hobby and sport as soon as possible.

**Caution:** Never use wrenches or (metal) pliers when assembling the magnet. These can fly onto your magnet with a high speed and damage the magnet. The consequences of your actions when using our magnets are your own responsibility.

**Step 1:** Always read the included warning form before you use our products;

**Step 2:** Retrieve the items (magnet, eye nut, bolt, self-locking nut and rubber ring) from the box. The rubber ring is not necessary when using the protective casing.

**Step 3:** Push the bolt through the hole of the magnet;

**Step 4:** Apply the rubber ring over the bolt;

**Step 5:** Twist the eye nut onto the bolt on top of the rubber ring;

**Step 6:** Then apply the nut to the bolt, between the eye nut. Do you have too little room? Then turn the eye nut back a little;

**Step 7:** Tighten the nut as tight as possible (this is a self-locking nut, which does not turn beyond the blue in the nut);

**Step 8:** Attach the rope and start magnet fishing!
