

# MAGNETAR

## ASSEMBLY

**360° all round fishing magnets  
with protective cover**

### STEP 1

After unboxing, you'll find all these parts: nut, eye bolt, rubber ring, bolt, protective cover and the fishing magnet.

### STEP 2

Insert the bolt up through the magnet from the bottom side (the side without logo).

### STEP 3

Place the protective cover over the fishing magnet.

### STEP 4

Screw the eye bolt on the magnet and tighten it. This also secures the protective cover in place.

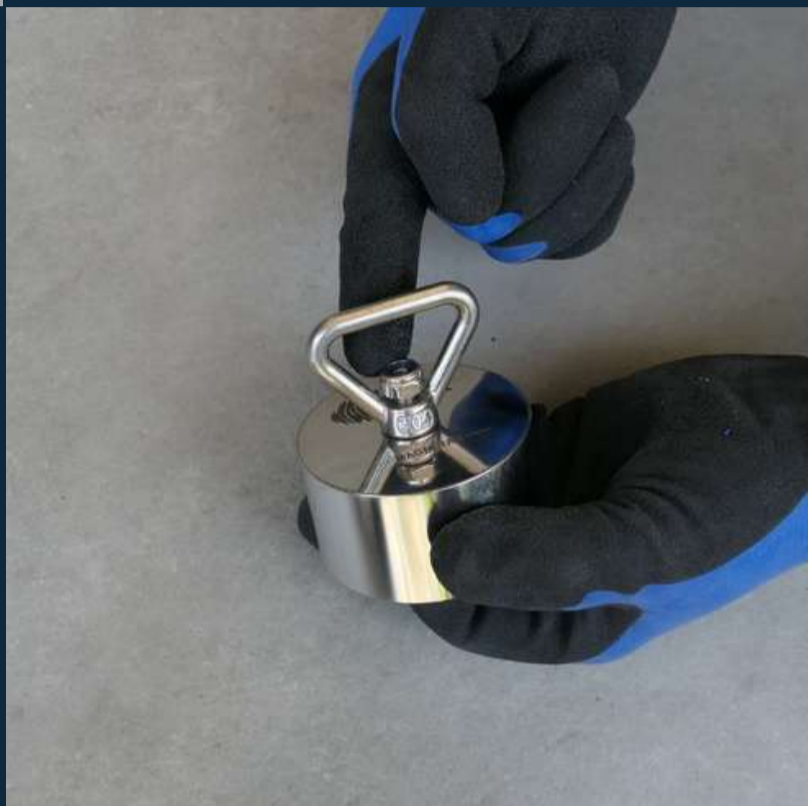

## STEP 5

Apply the supplied metal glue. Just a few drips will suffice.

## STEP 6

Manually attach the locknut. Try to close it as far as possible, but do not use any tools!

## STEP 7

Your fishing magnet is now ready for use!

Magnetar wishes you a lot of fun magnet fishing. Did you find any unique objects in the water? Tell us all about it and we might highlight your treasures on our socials!

**GOOD.  
BETTER.
