

MAGNETAR

ASSEMBLY

360° allround fishing magnets

STEP 1

After unboxing, you'll find all these parts: nut, eye bolt, rubber ring, bolt and the fishing magnet.

STEP 2

Insert the bolt up through the magnet from the bottom side (the side without logo).

STEP 3

Place the rubber ring over the bolt. Only do this when you don't use a protective cover.

STEP 4

Screw on the eye bolt and tighten it.

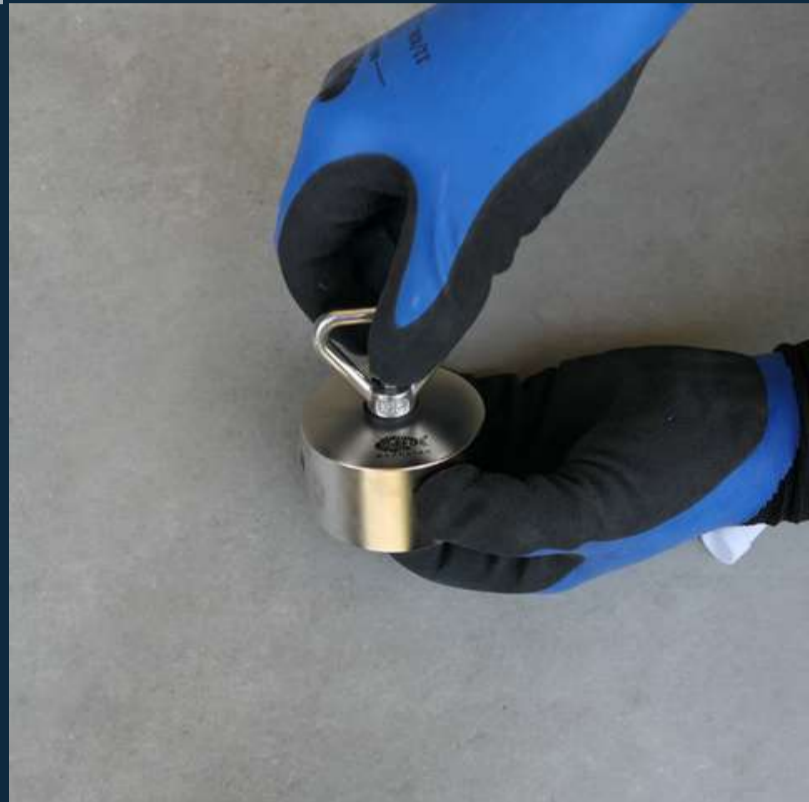

STEP 5

Attach the supplied metal glue. Just a few drips will suffice.

STEP 6

Manually attach the locknut. Try to close it as far as possible, but do not use any tools!

STEP 7

Your fishing magnet is now ready for use! Handle your magnet with care, because you aren't using a protective cover!

Magnetar wishes you a lot of fun magnet fishing. Did you find any unique objects in the water? Tell us all about it and we might highlight your treasures on our socials!
