

# MAGNETAR

## ASSEMBLY

### Bulldog fishing magnets

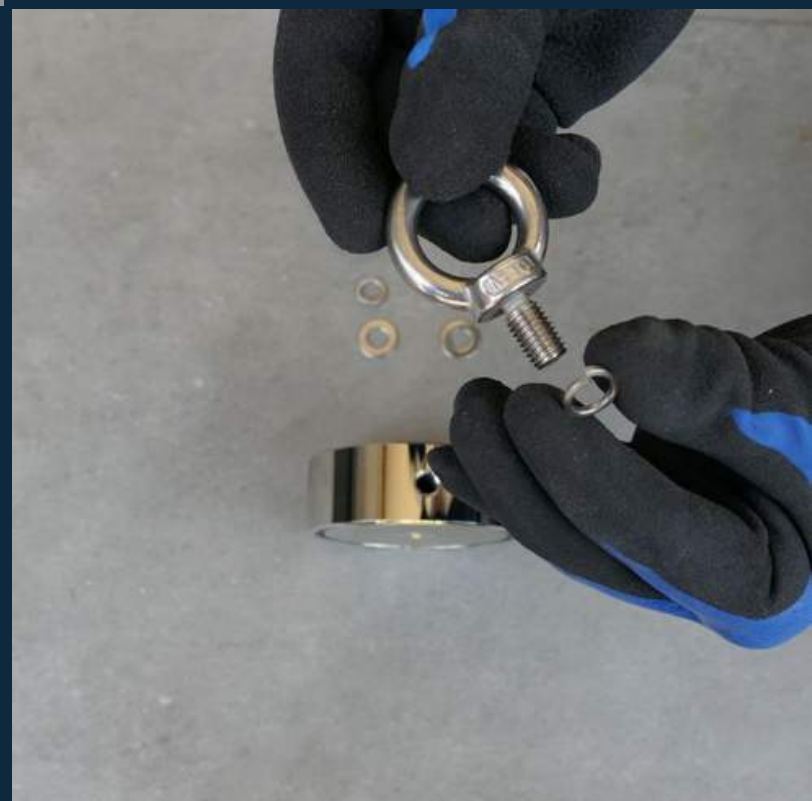

#### STEP 1

After unboxing, you'll find all these parts: eyebolts, rings, compression fittings, and of course the fishing magnet.

#### STEP 2

Place the compression fitting over the eye bolt.

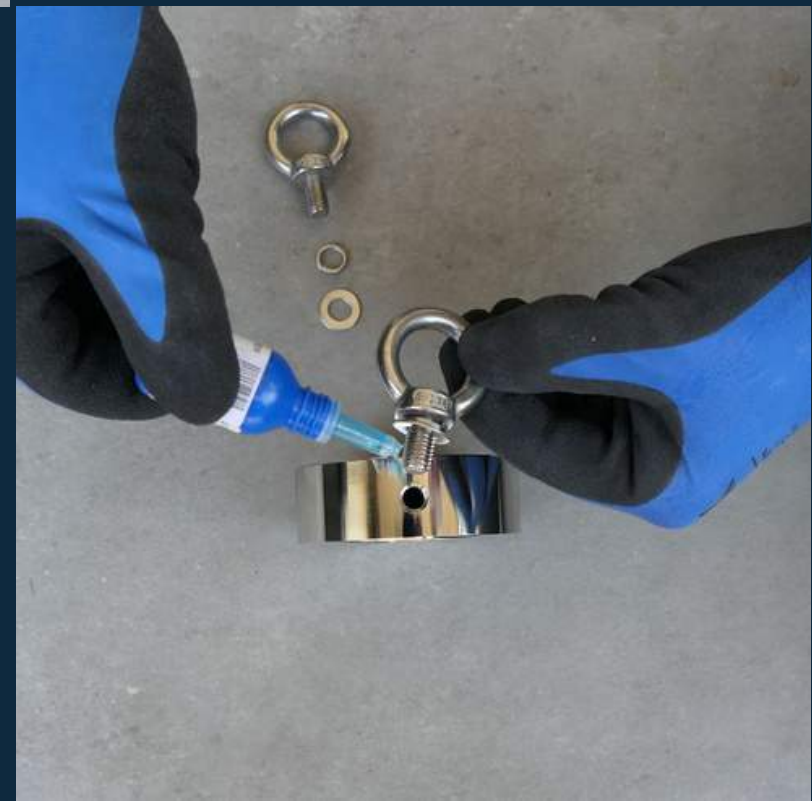

#### STEP 3

Place the ring over the eye bolt.

#### STEP 4

Attach the metal glue. Just a few drips will suffice.

## STEP 5

Fix the eye bolt solidly in place without using any tools.

## STEP 6

Repeat this process once more for the other bolt.

## STAP 7

You are now ready to start magnet fishing. With the double-sided magnet you can both 'pull' and 'dip' to find amazing objects.

Magnetar wishes you a lot of fun magnet fishing. Did you find any unique objects in the water? Tell us all about it and we might highlight your treasures on our socials!
